

USB EXTENDER + HUB

■ US-303 USB Extender + HUB

■ INTRODUCTION

This Unique USB Extender lets you locate your USB peripheral devices (USB Cameras, Printers, Scanners and so on) up to 150 feet away from your computer. This simply plug-n-play USB Extender consists of two units - Master and Remote. Using Cat. 5, Cat. 5e or Cat 6 Network cables, this device allows you to easily extend the distance between your computer and USB peripheral devices. Now you can enhance the capability and usefulness of your USB Devices.

■ FEATURES

- Compliant with the standard specification of USB 1.1.
- Supports self-powered mode.
- Supports plug-and-play.
- USB transceivers embedded at both ends to prevent signal loss.
- Overcomes the typical 15ft USB cable limitation.
- Extends the distance between computers and USB Peripheral devices up to 150 ft.
- Uses Standard Cat. 5 / Cat. 5e / Cat. 6 Network Cable (not included in the packet).
- No additional driver required.
- Pocket size, allowing for saving space.
- Supports Win 98 / 98SE / 2000 / XP, Mac OS 8.6 or higher
